ABOUT US

A software team that understands how businesses actually run

SHYLO Technologies was started in Hosur by an aeronautical engineer turned software builder, who has built data systems for manufacturing companies: from CNC machine data pipelines to company-wide dashboards. We help businesses stop relying on Excel, manual processes and disconnected systems, and we build every solution around how your team already works.

4
projects live in daily use

30 days
free fixes after every launch

2 hrs
reply time on working days

Fixed
quote before work starts

WHY BUSINESSES CHOOSE SHYLO

Manufacturing experience
Our founder has built data systems for manufacturers, from shop floor to dashboard.

You talk to the builders
No middlemen: the people who write the code join your calls.

Fixed quote, no surprises
Scope, timeline and price agreed before work starts.

Any technology you need
Dashboards, ERP, IoT, AI or apps: tell us what your plant needs and we build it, for manufacturers worldwide.

HOW WE WORK

1
Free 30-minute call
We understand your process, the problem and who will use it.

2
Fixed quote & plan
Written scope, timeline and a fixed price. No hidden charges.

3
Design first
You see the screens before we build.

4
Build in weekly parts
Working software every week to test and give feedback on.

5
Launch & support
Training for your team and support after go-live.

WHAT WE BUILD

Services

WEB & MOBILE

Website Development
Fast, mobile-friendly business websites that bring you enquiries.

E-commerce Website Development
Online stores with UPI and Razorpay payments, cart and order tracking.

Custom Web Application Development
Portals, workflow and tracking apps built around how your team works.

Mobile Application Development (Android & iOS)
Android and iOS apps for your customers, field team or staff.

DATA & ANALYTICS

Data Analysis & Business Intelligence
Power BI dashboards and reports that update themselves every day.

Data Engineering & ETL Pipeline Development
Pipelines that bring machine, Excel and ERP data into one clean place.

BUSINESS SOFTWARE

SaaS Product Development
Multi-company SaaS products from idea to launch, with billing built in.

CRM Development
Leads, follow-ups, quotations and WhatsApp in one CRM for your team.

ERP Development
Production, inventory, purchase and accounts connected end to end.

IOT & CLOUD

IoT Application Development
Collect machine and sensor data and act on it in real time.

Cloud Solutions & Integration
Azure, Google Cloud and Microsoft 365 set up and connected securely.

SOLUTIONS

Ready answers to common problems

AI applications & chatbots
Answer customer questions 24/7 on WhatsApp and your website.

AI agents & automation
Let AI handle repetitive office work: emails, reports and data entry.

Document AI
Read invoices, POs and forms automatically and stop typing data.

Microsoft 365 & SSO setup
Business email, Teams and secure single sign-on, set up properly.

IT consulting for small businesses
Honest advice on what software you need, and what you don't.
